Kate's lectures were very engaging and informative. She crafted effective discussion questions and in-class simulations to engage with the material.
I really appreciated Kate's teaching sessions. She is so knowledgeable and wove in concepts from many disciplines in her sessions. I deeply enjoyed her classes and her teaching style. She was clear, concise, and made excellent use of the time.
Kate is an amazing and helpful person. her teaching style is effective, engaging and filled with humility
I loved Kate's classes and have very little I would change. I think there were some small issues with time management and I would have liked to have a little less content and more space for discussions, instead of them being rushed, to finish on time. Kate could also be more assertive when bringing attention back from small group discussions. I noticed she was a little shy in trying to grab everyone's attention but I think it just needed to be a bit louder and clearer. Discussions in bigger groups instead of smaller groups I also feel tend to be more productive.
I recommend shorter periods for discussion amongst groups and only calling on or taking answers from some groups vice all, ate up too much time to finish instruction on time
Kate clearly had a thorough knowledge of the topics she was teaching, always came prepared for class, and had an enthusiasm for the course material that was contagious. She was effective at explaining concepts in memorable ways and engaging with students. Thank you for your hard work, Kate!
Kate's lectures were very engaging! She brought in relevant events that were connected to the theme and the objectives of all her lectures were broken down in a logical manner that made them very easy to comprehend. She had good pacing and delivery in her presentation and I liked the inclusion of think, pair, share as they were placed in important parts of the lecture.
I really enjoyed Kate's teaching style. It is clear that she prepares very thoroughly for each class. I especially appreciated how she connects environmental issues with other sectors of the economy and provides additional resources for further exploration. She is also very supportive and approachable during office hours.
